EDUCATION

Barnard College, Columbia University – New York, NY

B.A. in Computer Science | Expected Graduation: May 2028

Purdue University – West Lafayette, IN

Aeronautics and Astronautics Engineering (BSAAE) | Aug 2024 – May 2025 | GPA: 3.98/4.0

TECHNICAL SKILLS

- **Data & Office Tools:** Python, SQL, Microsoft Excel, Microsoft Office; basic data processing, document verification, and workflow analysis
- **Systems & Collaboration:** Git, Figma; experience in backend operation systems, troubleshooting, and process optimization
- **Languages:** Mandarin (native), English (fluent), French (B2)

WORK EXPERIENCE

Technology & Product Operations Intern

Bite Campus Eats, New York, NY | Feb 2026 – Present

- Participated in backend operation system optimization and feature iteration, supporting coupon management, targeted distribution, multi-dimensional filtering, and merchant-side configuration to improve operational efficiency and standardize merchant management workflows.
- Optimized merchant menu onboarding by translating a manual SQL-based configuration process into a more structured admin form and operating path, reducing configuration errors and improving new-vendor onboarding efficiency.
- Assisted in optimizing admin permission management, cross-role portal views, and email OTP login flows, improving internal team collaboration and overall system usability.

IT Intern

Agricultural Bank of China, Zhengzhou Branch | June – Aug 2025

- Participated in electronic PDF document processing and business workflow optimization, supporting stable contract stamping and signature operations.
- Assisted in unifying seal and signature logic and supported module integration into the car-loan contract workflow.
- Supported workflow testing, issue troubleshooting, and cross-team joint debugging to help ensure stable implementation in real business scenarios.
- Supported workflow testing, issue troubleshooting, and cross-team joint debugging to help ensure stable implementation in real business scenarios.

RESEARCH EXPERIENCE

Undergraduate Research Assistant

Industrial Engineering Lab, Purdue University | Mar – May 2025

- Used Python to automate experimental log processing for datasets, improving data organization efficiency and reducing manual entry time by 80%.
- Supported data inspection and quality control, helping improve experiment workflow stability and data reliability.

LEADERSHIP & ACTIVITIES

Organizational Committee Member, Internal & External Department

Global China Connection, Columbia University

- Led sponsorship outreach and external communication, coordinating 20+ New York restaurant partners for large campus events including Winter Formal and Chinese New Year Gala.
